**ONE AND SIX YEAR
STREET IMPROVEMENT PLAN
2025-2030**

THE CITY OF PLATTSMOUTH, NEBRASKA

In 1970, the State of Nebraska initiated a program developed to provide an integrated system of public roads for the state, counties, and municipalities. The Department of Transportation and each county and municipality develops a long-range Six-Year plan of highway, road and street improvements.

The Six Year plan is required by law to be extended annually and kept on file with the City Clerk.

Along with the Six Year plan, a One Year plan shall be annually prepared and placed on file with the City Clerk for specific highway, road and street improvements for the current year.

These plans must first be approved and adopted by the Governing Body after a public hearing.

The 2025–2030 One and Six Year Street Improvement Plan includes the following and is described in more detail on the following pages.

- A. The One Year Street Improvement Plan for 2025 consists of general maintenance and fourteen projects. These projects consist of new street paving, removing and replacing existing street paving and paving overlays. The total estimate for these projects is \$7,072,000.
- B. The Six Year Street Improvement Plan for 2025-2030 consists of general maintenance, the One Year Projects and nine additional projects. These projects consist of new street paving, removing and replacing existing street paving and paving overlays. The total estimate for these projects is \$6,435,000.

The total cost for all of the One and Six Year Projects is \$13,507,000.

- C. A location map and a summary of the individual projects and their estimated costs are included in this report.
